Dimensions:  
H cm 33 L cm 19 P cm 15  
Optional:  
Proximity TAG reader.

## G.S.E. - G.S.E. TAG

The G.S.E. and G.S.E. TAG is built with Inox steel Aisi 316 of 12/10 mm.

It makes any service ( shower, door, hydromassage, parking ) automatic with counters or coins, and it is supplied with all the accessories for its perfect functioning, 3 lighted leds indicate the state of the service and it is supplied with pause push-button that can be defused. It is particularly appreciated for its design and for its revolutionary closing which makes it inviolable against the most common vandalic acts.

In the version G.S.E. TAG, it gives the customer the possibility of choosing the traditional use with coin/counter or of buying a season-ticket with 5-10-30 pre-paid showers, and in the cheaper model without the use of terminals for re-loadings.

## TECHNICAL CHARACTERISTICS:

The electric operations are feed at very low tension 12V (also with battery, optional). All the functions are controlled by an avantgarde electronic card, at micro processor, with a large and easy possibility of programming.

Manual of setting up, maintenance and use, Certificate of Approval and Brand CE in compliance with law, are supplied.
